Why Worry?

The difference between investing and speculating is the difference between peace of mind and worrying. It is easy to pick out a safe investment. It requires great experience and confidence for safe and profitable speculation.

Ninety per cent. of the people, how-ever, are fond of speculating. Pure in-vesting is too slow. The 10%, however, who really invest, as, for instance, in Guaranteed First Mortgages, are about the only ones who have peace of mind and keep their principal intact.
